

The Rattle Stick adds vibration on any tool you click a handle into. Vibrate a 20' mag screed or a 6 inch walking edge tool and anything in between. That's the unique versatility of this tool. It has a powerful NIMH battery that will float 10 to 12K square feet. It weighs 4.2 pounds.

The Rattle Stick is the perfect partner for your bull float or channel float. Its vibration keeps your float from sticking to the surface. It brings the cream up and levels high spots and fills in low spots to create an evenly flat surface. It takes all the work out of floating in color hardener and puts more cream on the surface for polishing and superior stamp impressions. Imagine never having to use weights or shake your handles around trying to fill in holes or cold joints. Let this tool do all the work.

Helps with low slump mixes and finishes any slump of concrete faster and easier. The variable speed control gives you flexibility to dial in just the right amount of vibration for smaller tooling and changes in slump.
